Introduction

An experienced Manager and Recruiter looking for a career change in **Software Development**, skilled in **HTML** and **CSS** and **JavaScript**, improving day by day with Udemy's courses and personal projects, while also being a part-time Business and Management student at the Open University.

I'm looking for a company ready to give me a chance to show what I can do and where I'll be able to learn new skills and grow.

I'm a **team-player** with great interpersonal skills and able to bond with others easily, having developed these skills during my time as Manager.

Projects

- [My own Portfolio](#)

Created my own portfolio with the use of **HTML**, **CSS**, **Bootstrap** and **JavaScript**.

A straightforward portfolio which shows a short intro about me, technologies I use and projects I made, with effects implemented through the use of [AOS \(Animate on scroll\) library](#) to give more life to my website. Completely **responsive**.

- [Random Movie Quotes](#)

Built using **HTML**, **CSS**, **JavaScript** and **jQuery**.

With the use of **JavaScript** and **jQuery** every time the user presses "New Quote" it will generate a random new quote along with the author, random colour and background, and random font.

- [Tip Calculator](#)

Built using **HTML**, **CSS** and **JavaScript**.

With the use of **JavaScript**, I was able to calculate the total tip amount based on the bill amount, service quality and amount of people.

- [Cleaning Services](#)

Built a responsive website using **HTML**, **CSS** and **Bootstrap 4**.

I used **normalize.css** to make it responsive on different browsers and it's perfectly usable on smaller screens thanks to **Bootstrap 4**.

Technical Skills

- **HTML and CSS** – Learnt initially through freecodecamp.org with lessons and quizzes, then through Udemy's courses where I had code along lessons and projects to work through. Finally, I was able to build my first project.
 - **JavaScript (ES5 and ES6)** – Good understanding of it, I'm currently completely focusing on improving my skills on this by studying "The Modern JavaScript Bootcamp Course" on Udemy.
 - **Bootstrap** – Understood the importance through Udemy's courses and was able to use it on my first project, helped especially with the Navigation Bar and the responsive part of the website.
 - **C#** - Learning it through the 2D Game Development course on Udemy.
 - **Unity** - Learning it through the 2D Game Development course on Udemy.
 - **jQuery** – Had an introduction through one of Udemy's courses.
 - **NodeJS** – Used on "The Modern JavaScript Bootcamp Course" to build a few code-along projects, giving me an introduction and understanding of back-end development.
 - **JSON**
 - **Express**
 - **MongoDB** – Understanding of the database.
 - **Git** – Had an introduction on Udemy's course and used it to upload my project on GitHub.
-

Work Experience

Technology Recruitment Consultant – Reqiva; Roc Search; Xact Placements

April 2019 – April 2020

I worked as a Recruiter across three different agencies, organisation was key with a thorough daily structure to achieve objectives and deadlines.

Thanks to this experience I was able to get in touch with **Developers** and have an understanding of what their job is, I was able to bring my passion for technology to a whole new level.

Main programming languages I was looking after were **C++, .NET, JavaScript, HTML, CSS, React**.

Assistant Store Manager – Vodafone

July 2016 – April 2019

This was the role where my sales' passion and attention to KPIs and customer service showed up, and my 3 years at the company were full of successes and satisfactions:

- Started from a part time position, in less than a year I was promoted to Business adviser for my excellent sales and customer service skills and was moved from a small store to the second biggest store in the whole UK.
As Business Adviser my main objectives were to connect small businesses to Vodafone and create relationships with them. During my role I won multiple awards, from best adviser in the region to best performing store on business, earning bonuses every month for the whole financial year.
- In August 2018 I was promoted to Assistant Store Manager where the store performed splendidly, finishing on top 10 in the company.
- Main responsibilities are managing a big team of 25 people, hit daily targets, review performances, support local stores and occasionally lead the region on different KPIs.

Bar Manager – Frankie & Benny's
February 2016 – December 2016

F&B Assistant – The Grange Hotels
July 2015 – January 2016
